SUMMARY

An enthusiastic, keenly interested person towards the field of Machine Learning and Data Science. Truly obsessed and passionate about the booming technologies such as AI/ML and Data Science, possessing a strong foundational knowledge that has helped in solving various Machine Learning use cases. Proficient in Python and object-oriented principles, with conceptual expertise in Machine Learning and the fundamentals of Deep Learning. Enjoy exploring advanced concepts related to Machine Learning, Deep Learning, and statistical analysis.

SKILLS

- Programming Languages: Python, SQL(Basics)
- Machine Learning & AI: Machine Learning, NLP, Deep Learning (Basics)

PROJECTS

AI-Powered Resume Based Internship Matching System

- Designed an intuitive internship matching system that streamlines resume-based connections for users providing the applicants in finding the top 5 internships based on the applicant skills.
- makes the work of finding the right internships user friendly.
- Implemented Machine Learning models to match user profiles with relevant opportunities.
- Technologies Used: Python, NLP, Machine Learning Algorithms.

ACHIEVEMENTS

 Finalist in my first AI Hackathon

- Designed an intuitive internship matching system that streamlines resume-based connections for users.

 Winner at the screen smart Ideathon conducted by IEEE Student branch, REVA University

- Proposed an innovative idea for reducing the screen time in spending the time in social media by utilizing those time in leveraging the technical skills.

EDUCATION

BTech in Computer Science and Engineering

REVA University

09/2023 - Present

Intermediate (Plus 2)

LRG Naidu Junior College (97.2%)

03/2021 - 03/2023

10th Standard

Loyola English Medium School (96.7%)

06/2020 - 03/2021
